

Direct-acting heating the best option for your *next project?*

The rapid decarbonisation of the electrical grid is resulting in an increase in the popularity of electrical heating.

With this decarbonisation set to continue, and the cost, installation and aesthetic benefits of these products adding to the list of benefits, specification of this technology is becoming the logical solution for a number of houses, hotels, student accommodations and apartments.

One area where direct-acting heating excels is in control, with incredibly accurate thermostats on each product regulating room temperatures with minimum waste. There are also options for central control, smart-phone access and a bespoke commercial option.

Standard controls

Seven-day timer

0.2°C accuracy thermostat

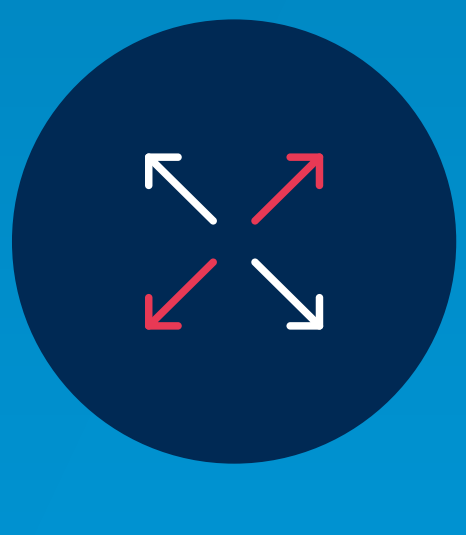

On-board open window sensing technology

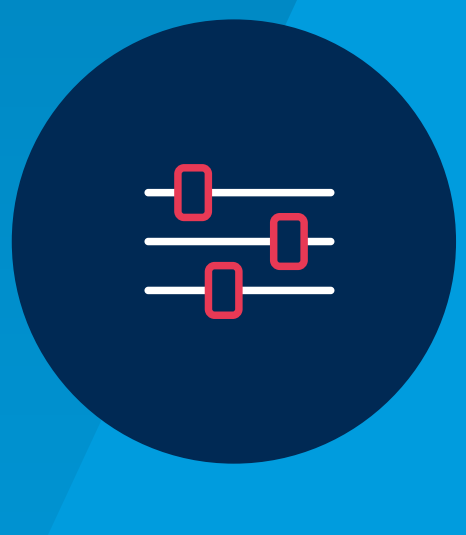

Adaptive start technology

'DimplexConnect' control

Zone control

Boost functions

Energy usage reports

Direct access to customer care

Remote device control

App controllability of connected heating and hot water systems

Share controls and sensory information with other devices, systems and platforms, to enable:

Improved efficiency

Improved accuracy

Reduced human intervention

Economic benefits

Direct acting heating is available in a range of different aesthetics and materials

to suit a wide range of applications, including:

- **CAMPASTYLE LAVA**
a beautiful heater in natural lava stone, perfect for high-end applications
- **GIRONA PANEL HEATER**
a glass-fronted heater with top-end style and control
- **MONTEREY PANEL HEATER**
a natural white panel that blends into modern interiors
- **BATHROOM PANEL HEATER**
a mirror-front bathroom heater with rowel rail, de-misting capability and radiant heating
- **PLXE PANEL HEATER**
a modern, natural white panel, offering great value and control

These heaters can be used alongside other technologies, such as hot water heat pumps, to create a compliant and cost-efficient electric heating and hot water specification.

Glen Dimplex Heating & Ventilation is a market leader in electric heating, and we can provide a range of electrical solutions to meet the needs of your project.
